The 26th annual conference of European Real Estate Society (ERES) was held on 3-6 July 2019 in France. The ERES conference is the leading real estate research meeting in Europe and is one of the largest property events worldwide. Following the first conference held in Amsterdam in 1994, the annual conference meetings have taken place in many European cities including Krakow in 2008.

The 26th ERES annual conference in 2019 was held at ESSEC Business School campus in Cergy. The conference in France was an excellent open forum for the exchange of ideas and the dissemination of research in areas such as real estate finance, economics, appraisal, investment and asset management. The scientific discussion focused mainly on the following 10 topics:

- Corporate Real Estate Management
- Valuation and Appraisal
- Real Estate Economics
- Real Estate Finance and Investment
- Assets and Facilities Management
- Housing
- Urban and Regional Analysis
- Sustainable Real Estate
- New Technology and Data in Real Estate
- Real Estate Education

As usual, the conference was attended by representatives of the world of science from all over the world. Poland was represented by three academic centres, i.e. Cracow University of Economics (Prof. Bartłomiej Marona), University of Gdańsk (Małgorzata Rymarzak, PhD) and University of Warmia and Mazury in Olsztyn (Prof. Radosław Wiśniewski and Justyna Brzezicka, PhD).

We are looking forward to the next, 27th Annual ERES Conference in Estonia. Conference entitled Embracing the digital future in real estate will take place on 1-4 July 2020 in Tallinn.
